DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Knopf et al. (US 6,126,439). Knopf is considered to disclose the claimed invention comprising:

a swirl generator **10** for a combustion-air flow and means for injecting fuel for producing a main flow;

a combustion chamber **30** arranged downstream of the swirl generator; and

a cavity **20** arranged between the swirl generator and the combustion chamber in which cavity a secondary flow can be produced, that encloses the main flow; or alternatively;

a cavity arranged between the swirl generator and the combustion chamber in which a secondary flow can be produced (please see column 4 lines 1-36). Knopf is also considered to disclose the claimed torodial shape, as shown in figure **2**, injection means **17**, and mixing section arrangements (column 3 line 29).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knopfel in view of Büchner et al. Knopfel is considered to disclose the claimed invention, as discussed above under the anticipatory rejection, except for the claimed pilot flame configuration and arrangement. Büchner is considered to disclose a pilot flame configuration and arrangement at column 4 line 24. It would have been obvious to one skilled in the art to combine the teachings of Knopfel with the pilot flame configuration and arrangement considered to be disclosed by Büchner for the purpose of allowing a secondary flow in burner that may be used with a main burner flow.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References C, D, and N, cited in this action, are considered to

disclose burners using swirl generator and combustion chambers with a cavity there between.
